Survey article

Schneider W: Analytical uses of Kalman filtering in econometrics – a survey 3

Articles

Abdul-Hadi N Ahmed: Preservation properties for the mean residual life ordering 143

Al-Osh M, Alzaid AA: Integer valued moving average (INMA) process 281

Alzaid AA: Mean residual life ordering 35

Banerjee KS: On the multilateral index number system based on the factorial approach 309

Bausch T: Optimized sampling by exchange methods 205

Brachinger HW, Schubert R: Measuring price-induced changes in standard of living in least developed countries: economic validity of laspeyres price indices and some further suggestions 85

Chen L, Eichenauer J: Two point priors and Γ-minimax estimating in families of uniform distributions 45

Ferentinos KK: On shortest confidence intervals and their relation with uniformly minimum variance unbiased estimators 59

Fraser DAS, Reid N: On comparing two methods for approximate conditional inference 271

Gil MA, Casals MR: An operative extension of the likelihood ratio test from fuzzy data 191

Jones PW, Madhi SA: Bayesian sequential methods for choosing the best multinomial cell: some simulation results 125

Jones PW, Madhi SA: Some sequential Bernoulli selection procedures with modified Bechhofer-Kulkarni stopping rules 301

Katzenbeisser W: On the joint distribution of the random variables 'number of inversions' and 'number of outstanding variables' in a randomly arranged sequence 133

Nijman T, Palm F: Efficiency gains due to using missing data procedures in regression models 249

Palm FC, Kodde DA: Computing Wald criteria for nested hypotheses 169

Schlittgen R: On the determination of sizes of markets 219

Tutz G: Sufficiency of variables in discrete discriminant analysis 257

Zmyślony R, Drygas H: On admissible estimation for parametric functions in linear models 113

Notes

Ahsanullah M: On a conjecture of Kakosyan, Klebanov and Melamed 151

Chawla JS: On necessary and sufficient condition for superiority of ridge estimator over least squares estimator 227

Dallas A: On some properties of the geometric distribution 231

Algorithm

Afflerbach L, Wenzel K: Normal random numbers lying on spirals and clubs 237

Book reviews: 76–82, 159–168, 245–246, 317, 318
